therapies

## METHOD OF USE

Apply homogenously on dry skin 30 minutes before sun exposure, until its correct absorption.

Apply immediately after the aesthetic treatment in case of sunlight exposure.

Repeat this procedure every two hours of insolation.

**Physic filter:** Titanium dioxide (13% stabilized, non-whitening effect).

**Organic filters:** Combination of 4 filters of wide spectrum (lyposolubles and hydrosolubles).

**Biological filter BFSP:** Photoprotector-100% natural (soy derived).

## CHARACTERISTICS

- Extreme Sunscreen UVA-B (1:3) SPF +50
- Great moisturizing effect. It prevents and repairs sun damaged skin (DNA repair).
- Soothing and healing properties. Anti-solar erythema.
- Water-proof, non-whitening effect, high substantivity.
- Indicated for sensitive and sun-intolerant skins.
- Domiciliary complement for photo-depilation treatments (IPL and Laser). Skin renewal (peeling, photo-rejuvenation, etc.)
