### LOCIÓN DESENGRASANTE

#### DEGREASING LOTION

Intertek

0014715-00

Intertek

QMS 131222-01

#### DESCRIPTION

Degreasing solution, oxygenating and light exfoliating action.

#### PROPERTIES

- Indicated for all skin types including oily and acneic skins.
- It eliminates the hidrolipidic layer leaving the skin free of incrustations, impurities and dead cells.
- When liberating the skin, facilitates the absorption and provides a greater and uniform contact with the treatment products (peelings, alfa-hidroxiacids, antiaging treatments, etc).
- Hydrolyzed soy protein increases mitochondrial metabolism and stimulates fibroblasts growth. It acts repairing the effects of aging, softening the skin and reducing skin roughness.

#### METHOD OF USE

After a proper make-up removal and cleansing with **MICELLAR CLEANSING WATER** we will prepare the skin for the recommended treatment: Soak the gauze (much better than a cotton) and apply over the whole area to be treated. We will insist and increase the pressure (mechanical peeling effect of the gauze) rubbing more strongly on the hyperpigmented areas or more damaged.

Do not remove or rinse off the skin.

#### LOCIÓN DESENGRASANTE

DEGREASING LOTION  
OXYGENATING AND EXFOLIATING  
INDICATED FOR ALL SKIN TYPES  
INCLUDING OILY AND  
ACNEIC SKINS  
IT CONTAINS HYDROLIZED  
SOY PROTEINS
